# Problem Statement Ideas

Six technology challenges at the intersection of the Kannada language, culture, and everyday life.

01

LANGUAGE LEARNING

## Kannada for Everyone

Develop an interactive platform that helps non-Kannada speakers learn practical Kannada through everyday conversations, situations, vocabulary, and guided practice.

02

VOICE & SPEECH

## Voice of Kannada

Develop a voice-based application that enables users to speak in Kannada and receive meaningful responses, pronunciation feedback, or language-learning assistance.

03

REAL-WORLD APPLICATION

## Kannada in Everyday Life

Develop a technology solution that helps people learn and use Kannada in real-world situations such as travelling, shopping, education, healthcare, transportation, and workplaces.

04

CULTURE & HERITAGE

## Namma Kannada — Regional Language Explorer

Develop an interactive platform to document and explore regional variations of Kannada, including local words, phrases, expressions, pronunciation, and cultural context.

05

DOCUMENT AI & OCR

## Kannada Text Digitization

Develop a solution that converts Kannada text from images, scanned documents, or handwritten material into searchable digital text and makes the content easier to understand and access.

06

TRAVEL & TOURISM

## AI Travel Planner for Karnataka

Develop an AI-powered travel planner that creates personalized Karnataka itineraries based on a traveller’s interests, available time, budget, and preferred type of experience.
